

Scope of Organisation

Novatron Scientific Ltd supplies and distributes humidity and water activity measuring and control equipment, also offering the service, repair and management of calibration of measuring and control equipment.

Quality Policy

Novatron Scientific Ltd has built a reputation by providing a quality calibration service & supply of humidity equipment to our customers . This will be maintained through effective implementation, ongoing maintenance and continual improvement of our management systems.

The commitment of Novatron Scientific Ltd extends to ensuring that customer, statutory and regulatory requirements including the requirements of ISO 17025 & ISO 9001 are always met. It is further committed to setting, measuring and monitoring business / quality objectives to continuously improve its performance.

Business processes are identified, documented and measured to ensure that where processes fail to meet planned objectives, corrective actions are identified and implemented to maintain continual improvement. Novatron Scientific Ltd aims to enhance awareness of this scope and policy amongst customers, colleagues and others who have an interest in our business.

Novatron Scientific Ltd undertakes to provide all clients with the highest quality calibration services commensurate with the requirements of a UKAS accredited calibration laboratory considering impartiality and confidentiality.

It is the responsibility of the management team to communicate the requirements of this policy which will be reviewed periodically as required.

Simon Long, General Manager – May 2026
